iLearning PLUS at a glance

iLearning PLUS is an award-winning Learning Management System designed to streamline your entire learning and compliance process.

- **Cloud-based or on-premises**

  iLearning PLUS can be deployed on-premise, via Seertech's cloud services or a cloud provider of your choice

- **Seamless integration**

  iLearning PLUS is designed to become an integrated part of your existing technology landscape, giving users access to all required learning and information. Our flexible architecture enables you to capitalise on your original investment whilst it evolves into a contemporary business-aligned learning ecosystem.

- **Highly configurable**

  Leveraging Oracle Technology, iLearning PLUS is infinitely configurable and constantly updated, with an open architecture designed to integrate with other key s HR/Talent system), external audiences and content providers.

- **Meets complex learning needs**

  iLearning PLUS is ideal for evolving learning needs up to a global scale, in particular for more complex areas such as certification, compliance and e-commerce solutions

- **Full training and a partnership approach**

  Seertech staff are highly skilled, empowered professionals who work in close partnership with clients to understand their business goals and aspirations and provide full training before, during and after installation

"The best results come from working with your client, not just for your client, and we combine the infinite configurability of iLearning PLUS with insider knowledge to align, and re-align our technology over time with a client's business goals and changing needs."

Paul Hardwick, Founder & CEO

Flexible, personal, role-based user experience

iLearning PLUS provides you with the functionality and flexibility to meet virtually every learning need.

With iLearning PLUS, each user accesses content and workflows specific to their job function. Users log into personalised dashboards containing upcoming engagements and information tailored to their specific job role. Managers can track competencies and participation; whilst instructors can see enrolment details.
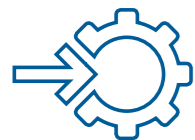

- Comes with standard packaged roles like learner, manager, instructor, course schedul¬er and site administrator
- User configurable to support any number of bespoke roles.
- Look and feel can be tailored to your brand and user requirements
- Multiple portals from a single instance, each with their own layout, branding and workflow rules

Advanced Reporting and Learning Analytics

iLearning PLUS offers more than 200 permission-based packaged reports, providing real-time access for each individual user. You can configure standard report parameters, columns, and with the Oracle Business Intelligence Enterprise Edition (OBIEE) option you can produce tailored reports for any situation.

- Scheduled reports
- Ad-hoc data warehouse driven reporting
- Learning budget management allows for tracking of budget limits and the setting of rules around course applications
- Reports tailored to the user role, device and context
- Survey tools allow for course evaluations
- Embed graphical fusion charts on key pages

Full integration with your other systems

iLearning PLUS is designed to become an integrated part of your existing technology landscape, giving users access to all required learning and information. Our flexible architecture enables you to capitalise on your original investment whilst it evolves into a contemporary business-aligned learning ecosystem.

- Bi-directional automated integration to any payroll and HR system (including Oracle EBS, Taleo recruit¬ment, PeopleSoft, JD Edwards, SAP and many others)
- Works with collaboration tools like WebEx, Yammer and Sharepoint
- Full support for manager and positional hierarchies
- Single sign-on provides ease-of-use
- Integration via web services or batch transfers supporting advance e-commerce and finance end-to-end transactions
- Fully supports customer tailored interfaces and workflows

Mobility

Users can enjoy the flexibility of accessing training through multiple devices, with responsive, touch screen enabled interfaces specific to their roles and context.

- Device specific interfaces and workflows
- Use case specific interfaces and work-flows, ensuring simplicity and ease of use
- Fully configurable branding and layout
- Roles-based content, such as reporting functions for managers
- Users can switch between big and small screen as required
- Extends your training capability to include a mobile workforce and those less familiar with computers.

eCommerce

iLearning PLUS offers a leading eCommerce capability, enabling you to target, sell, track and evaluate training to your internal and external audiences. We support the end-to-end eCommerce lifecycle from ordering though to payment reconciliation.

- Integrates with most payment gateways and financial management systems
- Use our embedded shopping cart or an externally sourced cart
- Supports numerous currencies, multiple taxation rates and 30+ languages
- Offers promotional/coupon codes, bulk billing and bulk enrolments
- The eCommerce interface and workflows can be tailored to match your process and branding requirements
